“Routine Retina: How to Manage Routine Pathologies”

While many retinal lectures present unusual and complex cases, it is essential to understand the latest in diagnosis, treatment and management of the more common pathologies encountered routinely in our practices. In this lecture, Dr. Autry will detail retinal conditions such as AMD, RVO, ERM and diabetic retinopathy with an emphasis on managing in a primary care setting and making the appropriate referral when needed.

Presented by:

Jill Autry, OD, R.Ph.

Dr. Autry received her pharmacy degree from the University of North Carolina at Chapel Hill. She practiced in critical care before returning for her optometry degree at the University of Houston. Following graduation, she performed a residency in ocular disease and surgical co-management at the Eye Center of Texas ophthalmology center where she is a partner today. Dr. Autry lectures nationally and internationally on a variety of pharmaceutical and ocular disease topics and has authored numerous articles for both optometric and pharmaceutical journals.

HCOS would like to thank OPTOS for providing dinner for this meeting and for their support of our society.
